

Line-Ups: Go to Team Home Page. There's 2 options to set line-ups. You can go under matches and either

- 1) click the "Options" button, there's a "Line Up" sub-header you can click on
- 2) For each specific match, there's also a Line-Up button on the right side

Both examples are highlighted in blue squares below for the Spoilers Match on 3 April at 3pm...

Once the Line-Ups button is clicked, you can now populate you're players for the 4 matches (Open 1, Open 2, Women's, and Mixed). Traditionally the 3pm matches are Open 1 and Women's, and the 4:30pm matches are Open 2 and Mixed. Creating Line-ups requires players to currently be on the team roster. The picture on the next page down demonstrates the drop-down for each match:

Now here's the real key to managing line-ups...having players enter their availability in TopDog (or the Captain entering it for the players) creates a tool that shows who is available when publishing the Line-up. That way the captain can schedule only available players (or at least available ahead of time). A great visual of this is entering the availability screen just prior to...or even during publishing the line-up as shown below:

So this shows for the Volley Ranchers 3 April match that 9 players are available (Amy can only play the 1st shift, which is the 3pm Women's Doubles)

So the Captain knows there's 4 Females and 5 Males available to schedule for 3 April (need at least 3 Females and the rest can be males...the Opens allow any combination of players, and actually up to 7 females and 1 male can make up the 8 players per team match (only 1 male mandated for Mixed Doubles))
